nickel, sealing the brass and creating a hard shell. Finally, it is dipped in pure 24 Karat Gold for the finished look. This double-dip electroplating process is used to ensure lasting beauty and durability.

9 ENAMEL/epoxy COLORING

Hard, durable colored epoxies are used to accentuate the features of the badge and allow for an exact color match to a department or company logo.

10 INSPECTION & QUALITY CONTROL

Each Hook-Fast product is thoroughly inspected for any imperfections before shipping. We are not satisfied until we know you will be too.

11 CLEAN MANUFACTURING

In all of our manufacturing processes, we observe the strictest controls in order to protect our environment.
